

ORAL POSTER SESSION 1 - Tuesday, June 28, 15:20

No.	SURNAME, Name	Title
7	CHUNG, Jiwon	Probing the Merging Blue Compact Dwarf Galaxies from Element Abundances and Star Formation Rate
13	DURRET, Florence	Atypical faint galaxies in Coma: the spectroscopic side
15	FERRIERE, Etienne	Extragalactic archaeology applied to understanding Early-Type Galaxies' formation within the NGVS and Atlas3D surveys
16	FRANK, Matthias	A close look at ultra-compact dwarf galaxies in the Fornax and Virgo clusters
18	GRAHAM, Alister	Massive black holes, nuclear star clusters, partially depleted cores and the connection with the host spheroid
23	KIM, Suk	Extended Virgo Cluster Catalog using SDSS DR7 Data
27	LEE, Youngdae	Ultraviolet Properties of Galaxies in the Fornax Cluster
31	MENDEZ-ABREU, Jairo	Bar formation in different environments: field, Virgo, and Coma
32	MEYER, Hagen Thilo	Properties and evolution of late-type galaxies and the connection to early-type dwarf galaxies in the Virgo galaxy cluster
35	MORELLI, Lorenzo	Multiband photometric decomposition of nuclear stellar disks in 3 Virgo cluster galaxies
40	PAK, Mina	Ultraviolet and Optical Properties of Dwarf Galaxies in the Ursa Major Cluster
57	WANG, Zhong	An Infrared Imaging Survey of Galaxies in the Nearby Universe
