

ORAL POSTER SESSION 2 - Wednesday, June 29, 15:20

No.	SURNAME, Name	Title
6	CHIES-SANTOS, Ana L.	Unravelling ages and metallicity distributions of globular cluster systems in E/S0 galaxies
25	LAGERHOLM, Carina	Stellar Populations and Kinematics of Early Type Galaxies - a 2-D view with VLT/VIMOS
30	LYSKOVA, Natalya	A simple recipe for estimating galaxy masses from minimal observational data
36	MORGANTI, Lucia	Dark matter and dynamics of intermediate-luminosity elliptical galaxies
42	PELETIER, Reynier	The Spitzer [3.6]-[4.5] colour for stellar population studies in local galaxies
44	RICHTLER, Tom	NGC 1316 and its cluster system
46	RYS, Agnieszka	Dynamics of early-type dwarf galaxies in the Virgo Cluster - a SAURON perspective
47	SANCHEZ-JANSSEN, Ruben	Globular cluster systems and the origin of early-type cluster dwarfs in Virgo
48	SCOTT, Nicholas	An IFU study of early-type galaxies in the Coma Cluster
55	VANDERBEKE, Joachim	Optical and near-infrared velocity dispersions of early-type galaxies
59	WU, Xufen	The line-of-sight kinematics of low redshift galaxies from cosmological simulations
