

Recording Results

Here is how I would ask you to please record results: The ranking software is written in FORTRAN, so the format of the input data is important. You will help me a lot if you follow these guidelines.

Continuous Draft Recording

For Continuous Draft just record the player names, and write "CoD" for the "short deck ID".

CIC Recording

For CIC we rank **each combination** of player/deck individually. Hence, the identifier is "composite" where the player is defined by the "name" listed below, the deck is defined by a (1 or 2 digit) integer represented by "X" or "XX" in the ID list.

Player name	IDs (1-9)	IDs (10 or higher)
