Publications in refereed journals based on ESO data (2011)

The ESO Library maintains the ESO Telescope Bibliography (telbib) and is responsible for providing paper-based statistics. Access to the database for the years 1996 to present as well as information on basic publication statistics are available through the public interface of telbib (<http://telbib.eso.org>) and from the "Basic ESO Publication Statistics" document (<http://www.eso.org/sci/libraries/edocs/ESO/ESOstats.pdf>), respectively. In the list below, only those papers are included that are based on data from ESO facilities for which observing time is evaluated by the Observing Programmes Committee (OPC). Publications that use data from non-ESO telescopes or observations obtained during 'private' observing time are not listed here.
