

A SYNOPTIC VIEW OF THE MAGELLANIC CLOUDS:
VMC, GAIA AND BEYOND

ESO-HQ, GARCHING BEI MÜNCHEN, GERMANY
September 9-13, 2019

**Invited review talk on star clusters
and multiple populations in the
Magellanic Clouds**

Bastian Nate, LJMU

I will review what is known about the star cluster system of the Magellanic Clouds and the stellar populations within them. This will include discussions on various features and their causes from extended main sequence turn-offs and split main sequences in young clusters, to the abundance anomalies seen in intermediate and ancient clusters.
